

**!!!!!!!!!!!!!! DATA .... UNEQUIVOCAL ... FROM NASA ITSELF ... CARBON "FOOTPRINT" PROVES THERE IS NO MAN MADE GLOBAL WARMING ISSUE ... THIS JUST IN FROM A LISTENER**

**THIS IS A NASA SATELLITE MEASUREMENT OF CO2 from between oct 1 to nov 11 world wide ... NOTE that the high concentrations have NOTHING to do with the high industrial or population areas that would be associated with global CO2 production from man made sources ... in fact the highest concentrations are over none other than the AMAZON JUNGLE where supposedly CO2 is converted to O2 by all the plants there ... clearly this shows conclusively that CO2 has nothing to do with man made sources ... not to mention the death of the concept that the jungles create our oxygen supply or that man made CO2 has anything to do with temperature rise or alleged global warming ... and a long list of other issues ... happy new year ... jim mccanney**
